

The City of Seattle's **School Road Safety Initiative**

Before and After, Dearborn Park Elementary, 9/4/2013

Below are before and after images that provide an example of one type of investment (sidewalks) that will be made possible through school zone speed camera revenue in 2013-2014. Crossings and other traffic calming, as well as education and encouragement programs, will also occur.

Roughly half a mile of new sidewalk was constructed near Dearborn Park Elementary in 2012, on the south side of the street between 32nd Ave South & Beacon Ave South. Funding was made possible through a partnership between the City's Sidewalk Development Fund, the City's Neighborhood Street Fund, and Washington State Department of Transportation Safe Routes to School grant. Education and encouragement campaigns were also conducted in partnership with Cascade Bicycle Club and Feet First.
